

ISANDO

Has an average output of plus minus 2000 tons per month. Geared up to accommodate heavy structural steel up and till 13m in length. With an improved lay down area and increased loading capacity by addition of a tower crane we strive to give "A" class service to all our customers big or small. Isando's loading bay uses only PU coated slings to load completed material to minimize handling damage.

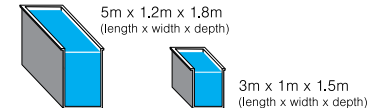

ISANDO

DUNSWART

Has an average output of plus minus 900 tons per month. This branch specializes in small structural components and is geared up to accommodate items up and till 5m length. A second line specializes in centrifugal for the customer with the smaller then regular items. Two production lines ensure flexibility in meeting customer delivery requirements. A high level of expertise and quick turnaround are assured.

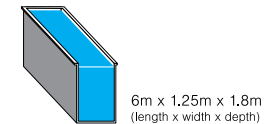

DUNSWART

RANDFONTEIN
